Monthly Monitor Report on Demolition Processes and Israeli Violations against Palestinians' Households and Facilities.

Within the period: 1/2/2021-28/2/2021

Human Rights and Democracy Media Center SHAMS February 2021

Conducted by: Rinad M & Mohammad Najjar

This report was written for the purpose of monitoring violations conducted by the Israeli occupation forces against Palestinians' households and facilities, including demolitions, evictions, confiscations, and notices of such activities in the future. The report was prepared in accordance with ground observations collected by staff members and researchers of the Human Rights & Democracy Media Center "SHAMS" throughout the period 1/2/2021-28/2/2021 and is the outcome of relevant monitoring efforts carried out by SHAMS within the geographical scope defined as the West Bank and which includes Eastern Jerusalem.

-The General February Survey

Throughout February of 2021, “**SHAMS**” Center has monitored the targeting of (265) facilities owned by Palestinians by the Israeli occupation forces, either in the form of demolition, confiscation, eviction, or distribution of notices that announce similar practices in the future.

The most prominent violations came in the form of demolitions, which took place in (60) facilities. Out of those, the owners of (9) facilities were forced to demolish them on their own as they were threatened with fines and jail-time. Furthermore, the occupation forces confiscated and seized one facility. This took place in Um Al-Khair village located to the east of the town of Yatta in the Hebron governorate, where occupation forces confiscated a tent owned by the *Al-Hathaleen* family.

Regarding demolition notices, the occupation forces notified **(65)** facilities of future demolitions, confiscations, or forced evictions. The majority of those facilities were housing units, in addition to others that were commercial and agricultural facilities as well as cattle barns/barracks.

Regarding forced evictions, the Israeli occupation authorities handed a lawyer representing the *Batn Al-Hawa* neighborhood families in the town of Silwan, located to the south of Jerusalem’s Old Town, a ruling of the Israeli Magistrate’s Court that orders the eviction of a building owned by the citizen Younis Shhada and his sons’s families and the subsequent handing over of that building to the Ateret Cohanim settler organization. The building is comprised of 5 apartments that house about 22 individuals.

In alignment with the occupation’s policy of harassing citizens in the Northern Jordan Valley, the occupation forces caused through their military training in the *Khila Ijmai*’ area the burning of a tent with everything it contained that is owned by the citizen Fayez Muhammad Sbaih.

- Distribution of facilities based on their type

The targeted facilities, whether by demolition, confiscation, eviction, or notices of future practices, are distributed as follows:

Table (1): Targeted facilities based on their types:

Type of facility	Number
Households	68
Tent housing units	57
Tin housing units/ house barracks	4
Trailer Parks	2
Housing rooms	1
Water wells	7
Retaining Walls	2
Commercial Facilities	3
Barns and farmhouses/cattle barracks	62
Agricultural rooms	1
Touristic facilities	1

Pitch/Field	1
Agricultural canopies	2
Vegetable vendors' carts	52
sewage units, facilities, and rooms	1
Water reservoirs	1

- The distribution of facilities targeted with demolition based on their location with respect to the governorates.

When it comes to the geographical distribution of the demolitions in accordance with the regional indicator, the majority of the targets were in the Tubas governorate, where (104) facilities have been demolished. The Jenin governorate, where (52) facilities have been demolished, came in second place, followed by the Jerusalem governorate, where (17) facilities have been demolished. The facilities referenced here include any of the types mentioned in table (1), and SHAMS Center has monitored demolitions with respect to the governorates in which they have occurred as follows:

Table (2): The distribution of facilities targeted with demolition based on their location with respect to the governorates:

Governorate	Number of demolished facilities
Tubas	104
Jenin	52
Jerusalem	17
Hebron	10
Bethlehem	4
Jericho and the Valley	4
Ramallah	2
Tulkarem	1

- Distribution of facilities targeted with notices based on their location with respect to the governorates.

Regarding notices that notify residents of demolitions, confiscations, evictions, orders to suspend construction activities and other practices that deprive Palestinians of their right to build and invest in their facilities, **(65)** cases have been recorded in different areas. These notices point to the future concentrated trends of the Israeli violations against Palestinians. The governorates of Nablus and Salfeet came on top of the list, followed by Hebron as the following table shows:

Table (3): Distribution of facilities targeted with notices based on their location with respect to the governorates

Governorate	Number of notified facilities
Nablus	41
Salfeet	12
Hebron	8
Bethlehem	4

- Targeted Population

Since the violations against Palestinian facilities do not take place in isolation of the population, the number of targeted residents throughout February was at least (184), including (78) children and (7) women, the suffering of whom which is amplified within the context of such violations

- Pretexts for the violations

Surveying the pretexts employed by "Israel," the occupying power, in an attempt to legitimize its crimes, we find that the number of facilities that were demolished under the pretext of unauthorized construction in areas (C) was **(142)** out of **(194)** facilities that were demolished overall. **(51)** other facilities were targeted under the pretext of their proximity to occupation checkpoints or the Apartheid Wall.

Regarding notices and confiscations, all the pretexts used pertained to unauthorized construction in areas (C). Forced evictions were carried out under the pretext of handing the facilities to the Ateret Cohanim settler organization.

- Self-demolition

Self-demolition represents a particular type of systemic and concentrated subjugation. Palestinian residents of Jerusalem are forced to demolish their own homes and facilities under the threat of hefty fines. If they refuse to do so, they are over-charged with the costs of the demolition of their own facilities. This practice noticeably displays the alignment of all the components of the racist Israeli establishment: courts, local bodies, the police and army forces. It also is a crime the victims of which are forced into committing against themselves.

Throughout February, the number of facilities whose owners were forced to self-demolish was (9) out of (194) that were demolished overall. (7) of these were in the Jerusalem governorate, (1) in the Hebron governorate, and (1) more in the Bethlehem governorate. (3) of these facilities were houses, (3) were cattle barns, (1) was a housing tent, (1) housing room, and (1) commercial facility all under the pretext of unauthorized construction.

In the Shu'fat neighborhood of Jerusalem, the occupation forces coerced the citizen Jihad 'awad-Allah into self-demolishing his home which consists of two floors (two apartments). The area of each is 120 square meters. The occupation forces had warned him on an earlier occasion that he ought to do so to avoid hefty fines, which he would have paid had the demolition under the pretext of unauthorized construction been carried out by the occupation forces.

In the Jerusalem neighborhood of Ras Al-Amoud, the occupation forces coerced the citizen Mu'taz Khalil into self-demolishing his two-floor home under the pretext of unauthorized construction. The occupation forces also forced the family of the citizen Abu Wahdan in Jerusalem's Silwan neighborhood to self-demolish an external room attached to their home and built out of iron bars and cloth. In the Tha'la region located to the East of the town of Yatta, the citizen Omar Shinran was coerced into self-removing a housing tent in which he lived with his 13 family members, after he'd been notified earlier to do so.

In the Silwan neighborhood in Jerusalem too, the occupation forces forced the citizen Omar Siam to self-demolish two cattle-rearing barns. The forces had warned him on an earlier occasion that he ought to do so to avoid hefty fines, which he would have paid had the demolition under the pretext of unauthorized construction been carried out by the occupation forces. In the Al-Fireidis village in Bethlehem, the occupation forces coerced the citizen Suleiman Ahmad Al-wahsh into self-demolishing a 60-meter-squared cattle-rearing barn under the pretext of unauthorized construction. In Jerusalem's Ras Al-Amoud neighborhood, the citizen Ihsan Abu Al-Soud was coerced into self-demolishing his 17-year-old commercial facility (car repair workshop), the area of which is 120 meter squared, under the pretext of unauthorized construction. He had been warned that, if the demolition process were to be carried out by the occupation forces, he would face hefty fines.
