Monthly Monitor Report on Demolition Processes and Israeli Violations against Palestinians' Households and Facilities.

Within the period 1/3-31/3/2021

Human Rights and Democracy Media Center “SHAMS”

March 2021

Conducted by: Rinad Mosa & Mohammad Najjar

This report was written for the purpose of monitoring violations conducted by the Israeli occupation forces against Palestinians' households and facilities, including demolitions, evictions, confiscations, and notices of such activities in the future. The report was prepared in accordance with ground observations collected by staff members and researchers of the Human Rights & Democracy Media Center "SHAMS" throughout the period 1/3/2021-31/3/2021 and is the outcome of relevant monitoring efforts carried out by "SHAMS" within the geographical scope defined as the West Bank and which includes Eastern Jerusalem.

-The General March Survey

Throughout March of 2021, “**SHAMS**” Center has monitored the targeting of (100) facilities owned by Palestinians by the Israeli occupation forces, either in the form of demolition, confiscation, eviction, or distribution of notices that announce similar practices in the future.

The most prominent violations came in the form of demolitions, which took place in (64) facilities. Out of those, the owners of (12) facilities were forced to demolish their facilities on their own as they were threatened with fines and jail-time. Furthermore, the occupation forces confiscated and seized (3) facilities as follows: near the city of Qalqilya’s eastern entrance, they confiscated a container used for selling vegetables owned by citizen Kamal Yassin under the pretext of lack of authorization and due to its location in an area C, which is under Israeli control (yet populated by Palestinians). They also confiscated in the town of Al-Za’eem to the east of the occupied East Jerusalem a container that contains video-shooting and surveillance equipment owned by the citizen Muhammad Khalil. They also confiscated another container that is used as a gas station and owned by the citizen Muhammad Odeh Sa’di. Both containers were confiscated under the pretext of unauthorized construction.

Regarding demolition notices, the occupation forces notified **(33)** facilities of future demolitions, confiscations, or forced evictions. The majority of those facilities were housing units, in addition to others that were commercial and agricultural facilities as well as cattle barns/barracks.

- Distribution of facilities based on their type

The targeted facilities, whether by demolition, confiscation, eviction, or notices of future practices, are distributed as follows:

Table (1): Targeted facilities based on their types:

Type of facility	Number
Households	43
Tin housing units/ barrack-like homes	9
Tent Housing Units	6
Housing rooms	4
Trailer Park homes	1
Retaining Walls	1
Commercial Facilities	9
Warehouses	5
Barns and farmhouses/cattle barracks	11
Agricultural rooms	7
Mobile Trailer Parks	2
Greenhouse	1
Celebration Hall	1

- The distribution of facilities targeted with demolition based on their location with respect to the governorates.

When it comes to the geographical distribution of the demolitions in accordance with the regional indicator, the majority of the targets were in the Jerusalem governorate where (24) facilities have been demolished. The Jericho and the Valley governorate, where (14) facilities have been demolished, came in second place, followed by the Hebron and Nablus Governorates, where (9) facilities have been demolished in each. The facilities referenced here include any of the types mentioned in table (1), and “SHAMS” Center has monitored demolitions with respect to the governorates in which they have occurred as follows:

Table (2): The distribution of facilities targeted with demolition based on their location with respect to the governorates:

Governorate	Number of demolished facilities
Jerusalem	24
Jericho and the Valley	14
Hebron	9
Nablus	9
Bethlehem	7
Salfeet	1

- Distribution of facilities targeted with notices based on their location with respect to the governorates.

Regarding notices that notify residents of demolitions, confiscations, evictions, orders to suspend construction activities and other practices that deprive Palestinians of their right to build and invest in their facilities, **(33)** cases have been recorded in different areas. These notices point to the future concentrated trends of the Israeli violations against Palestinians. The governorates of Jerusalem and Hebron came on top of the list, followed by Bethlehem and Nablus as the following table shows:

Table (3): Distribution of facilities targeted with notices based on their location with respect to the governorates

Governorate	Number of notified facilities
Jerusalem	18
Hebron	7
Bethlehem	3
Nablus	3
Jenin	1
Salfeet	1

- Targeted Population

Since the violations against Palestinian facilities do not take place in isolation of the population, the number of targeted residents throughout March was at least (114), including (57) children and (13) women, the suffering of whom which is amplified within the context of such violations

- Pretexts for the violations

Surveying the pretexts employed by "Israel," the occupying power, in an attempt to legitimize its crimes, we find that the number of facilities that were demolished under the pretext of unauthorized construction in areas (C) was **(62)** out of **(64)** facilities that were demolished overall. The **(2)** remaining facilities were demolished under the pretext of constructing a settler construction project. In the town of Kufr Aqab in the Jerusalem governorate, they demolished a granite-stone store and warehouse owned by the citizen Sadiq Al-Hitawi to make way for the construction of a sports complex and a settler park at the expense of citizens' lands

Regarding notices and confiscations, all the pretexts used pertained to unauthorized construction in areas (C).

- Self-demolition

Self-demolition represents a particular type of systemic and concentrated subjugation. Palestinian residents of Jerusalem are often forced to demolish their own homes and facilities under the threat of hefty fines. If they refuse to do so, they are over-charged with the costs of the demolition of their own facilities. This practice noticeably displays the alignment of all the components of the racist Israeli establishment: courts, local bodies, the police and army forces. It also is a crime the victims of which are forced into committing against themselves.

Throughout March, the number of facilities whose owners were forced to self-demolish was (10) out of (64) that were demolished overall. All of these were in the Jerusalem governorate. (7) of these facilities were houses, (3) were commercial facilities and they were all done under the pretext of unauthorized construction.

The occupation forces coerced in the Silwan neighborhood in the city of Jerusalem the citizen Nidal Muhammad Al-Salaymeh into self-demolishing his own house under the pretext of unauthorized construction despite the fact that he is a cancer patient and lives in that home with his 5-member family, three of whom are children. In Al-Issawiya town in the

Jerusalem governorate, they also coerced the citizen Muhammad Isa Naser Abu Riala into self-demolishing his own house under the pretext of unauthorized construction. They had previously given him a notice that he would have to pay extremely hefty fines if the demolition process were to be carried out by the occupation authorities themselves. He had been living in there with his wife and 5 sons and daughters the oldest of whom is 20 years old and the youngest of whom is 16. In another incident in the Silwan neighborhood in the city of Jerusalem, the citizen Ahmad Isa Hijazi was coerced into self-demolishing his own home, which housed 14 individuals, 3 of whom are children.

The occupation forces also coerced in Al-Issawiya town in the Jerusalem governorate the citizen Sami Muhammad Sa'eed Ubeid into self-demolishing his own 100-m² house. In the Shu'fat Camp in the same city, they coerced citizen Muhammad Bassam Al-Sabbah into self-demolishing his house (2 floors and still under construction). In Al-Issawiya, they coerced the citizen Raja'i Talal 'tiya into self-demolishing his own house too. All of these citizens had been given notices that they would have to pay extremely hefty fines if the demolition process were to be carried out by the occupation authorities themselves.

The occupation forces coerced in the Industrial Zone "Atarot" to the north of the city of Jerusalem the citizens Adham Tabsh Abu Sneineh and another citizen from the Al-Rajbi family into self-demolishing their commercial facilities. In Jabal Al-Mukabir neighborhood, the citizen Muhammad Husein Ja'afra was coerced into self-demolishing his own commercial facility (restaurant) under the pretext of unauthorized construction. They had previously given him a notice that he would have to pay extremely hefty fines if the demolition process were to be carried out by the occupation authorities themselves.
